

# Carlin Queen Project

## *Silver Discovery Ready for Advancing* Why Invest?

Previous drilling has demonstrated the presence of significant silver mineralization, but no follow-up drilling was completed.

Faulting at Carlin Queen has brought the Vinini Formation close to the surface. The Vinini Formation is the host for most of the high-grade veins at Hecla Mining's 2 Moz Hollister Mine, located 6 km south.

## Location and Access

Ivanhoe Mining District in western Elko County, Nevada.

The property is within a two-hour drive of two full-service mining towns, Elko and Winnemucca, and is accessed via paved roads and graded gravel roads.

Part of the Midas and Carlin Trends.

## Project Highlights

- Land Position: 73 claims (~1,508 acres)
- Low Sulphidation Epithermal Silver-Gold Veins
- Situated along the Northern Nevada Rift, a Miocene-age structural zone that hosts several current and past producing mines.
- The largest of these are Newmont's Mule Canyon and Hecla Mining Company's (Hecla) Midas (Ken Snyder) and Hollister Mines
- Fairchild is currently planning its maiden exploration program at the Carlin Queen Property

## Management Team

**Nikolas Perrault, CFA** – *Executive Chairman*

**Luis Martins** – *CEO*, former Director of Geology & Mining Institute (Portugal)

**Sergei Diakov** – *Technical Chair*, discovery of Oyu Tolgoi/Nuevo Chaquiro

**Aaron McBreairty** – *Senior Geologist*, porphyry/AI exploration expert

**Richard Redfern** – *QP*, 43-101 author

**Guy Lauzier** – *Mining Engineer & Consultant*, Golden Arrow Project

**Robert Rosner** – Chief Financial Officer

## Strategic Advisory Board

**Jill Kelley** – *Diplomatic Advisor*

**Bash Kazi** – *Business Advisor*

**Shahal Khan** – *Strategic Investor*

**Malcolm Smith** – *Capital Markets Advisor*

**Ambassador Hans H. Hertell** – *Diplomatic and Investment Advisor*

---

## Ownership and Capital Structure

Shares Outstanding **178,447,781**

## **Disclaimer & Forward-Looking Statements**

**Disclaimer** - Certain statements contained herein, as well as oral statements that may be made by Richard Redfern QP may constitute “forward-looking statements.” Any reference to a “Historical Resource” contained herein is considered historical in nature and as such is based on prior data and reports prepared by previous property owners. Some of the rock chip and drillhole sample assays presented herein are from historical data that may pre-date NI 43-101. Most of the assays were performed by professional, ISO-certified assaying companies. The historical works mostly were conducted under the supervision of a person who is/was a Qualified Person. All post 2012 rock chip geochemical analyses were performed by certified assay labs. As such, the historical sampling, assaying and QA/QC protocols are not known, and therefore these results must also be seen and interpreted in an historical context. These data are presented here for historical information purposes only. These data have been studied and verified and felt to be appropriate at this early stage of this exploration project by Richard R. Redfern, MSc. and QP, who has written 43-101 technical reports on mineral properties. The contents of this presentation, including the historical information contained herein, are for informational purposes only and do not constitute an offer to sell or a solicitation to purchase any securities referred to herein.

**Forward looking statements** - This presentation includes certain forward-looking statements about future events and/or financial results which are future predictions in nature and are subject to risk and uncertainty. Forward-looking statements include, without limitation, statements regarding the company’s plans, goals or objectives and future completion of mine feasibility studies, mine development programs, capital and operating costs, production, potential mineralization and reserves, exploration results and future plans and objectives of Fairchild. Forward-looking statements can generally be identified by forward-looking terminology such as “may,” “will”, “expect,” “intend,” “estimate,” “anticipate,” “believe,” or “continues” or the negative thereof or variations thereon or similar terminology. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from expectations include risks associated with mining generally and pre-development stage projects in particular including but not limited to changes in general economic conditions, litigation, legislative, environmental and other judicial, regulatory, technological and operational difficulties, labor relations matters, foreign exchange costs and rates.
